File Edit Format View Help

- React based, Firebase backed, possible API use, only one page.
- Users must sign in through Firebase to use the site.
- Whiteboard website that allows for drawing, text, gifs, etc.
- Sticky notes can also be added to the board which includes the same media.

File Edit Format View Help

- The gimmick: Whiteboard gets erased after three days.
- Website takes screenshot of current page and everything gets archived.
- Timer present at top of website signaling impending doom.
- Possible side page that links all past archived images.

File Edit Format View Help

- The group has past experience with React, APIs, and Firebase.
- The group also has experience with Web App, Computer Graphics, and Mobile Apps through LMU Classes.
- We hope to expand our skills and abilities with web design and applications.

File Edit Format View Help

- This project has a moderate level of difficulty but is still fun and can be completed in the Fall 2024 semester.
- This project also can be expanded upon throughout future semesters .
- It's funny.

Thank You!
